

WRAPPED AROUND

Intro: 8 measures

Every day I clock out, and head straight to her house
We cuddle up on the couch, but it always ends the same old way
I'm driving home and it's incredibly late
Something's got to change

Cause I've been wrapped around her finger since the first time we went out
Every day every night she's all I think about
I need that girl beside me when the lights go out
I think it's time to put a ring on the finger I'm wrapped around

Went to the bank took out a loan, went and bought the perfect stone
Called up her dad on the phone, I'm takin' him to dinner Sunday night
I've never been so nervous in my life
I want to do this right

Cause I've been wrapped around her finger since the first time we went out
Every day every night she's all I think about
I need that girl beside me when the lights go out
I think it's time to put a ring on the finger I'm wrapped around

Solo: 8 measures

Yes sir I love her very much
I know it's only been seven months
But that's long enough

Cause I've been wrapped **stop** around her finger since the first time we went out
Every day every night she's all I think about
I need that girl beside me when the lights go out
I think it's time to put a ring on the finger I'm wrapped around
I think it's time to put a ring on the finger I'm wrapped around
